EDUCATION

Istanbul Aydın University (2022 - 2026) **Istanbul**
Bachelor of Engineering, Software Engineering Cumulative GPA: 3.54

WORK EXPERIENCE

SirDash.ai **Berlin, Germany**
Frontend Developer (Remote) Feb 2026 - Present

- **Contributed to the core application,** actively implementing and managing application features to enhance platform functionality.
- **Developed and optimized the landing page** using Vite and Tailwind CSS, ensuring high performance, responsive design, and an enhanced user experience.
- **Integrated Supabase** to establish a secure, seamless user onboarding flow on the landing page and engineered an admin panel feature for publishing product release notes.
- **Managed and optimized application deployments utilizing AWS** Elastic Beanstalk while configuring CloudFront to ensure fast, secure global content delivery and high platform availability.
- **Contributed to the development of landing page backend services** and authentication flows using Node.js, Express.js, and MongoDB.
- **Collaborated in an Agile environment,** actively participating in daily meets and sprint plannings.

Stork **Istanbul, Turkey**
Frontend Developer Sep 2024 - Sep 2025

- **Developed e-commerce web application** using Next.js, TypeScript, and Tailwind CSS, focusing on responsive design and SEO optimization.
- **Engineered a cross-platform mobile application with React Native**, ensuring a consistent shopping experience across iOS and Android.
- **Architected the migration of the legacy codebase** from JavaScript to TypeScript, improving type safety and reducing production bugs.
- Modernized the styling architecture by transitioning from vanilla CSS to Tailwind CSS to improve developer experience and ensure UI consistency through the project.

PROJECTS

- **Project Selector** - Web-based platform to digitize the project selection process for students and management of projects for lecturers for Istanbul Aydin University. Replacing inefficient and time consuming manual workflows.
- **Gemini Folder Organizer** - A browser extension to boost productivity in Gemini. The folder feature that the Gemini is missing.
- **Revita Luxury Website** - A high-end e-corporate website for Revita Luxury, a Spain-based medical aesthetics distributor, focusing on a premium user experience for healthcare professionals sourcing dermal fillers and medical devices.
- **monocount** - A minimalist, cross-platform counter application featuring real-time synchronization across devices. Built with React, Node.js, Express.js, and MongoDB, supporting frictionless authentication via Google OAuth and passwordless Magic Links.
- **Peek** - A lightweight Windows system tray application for monitoring GitHub pull requests, providing at-a-glance review and CI statuses with instant access to active PRs. Built using Tauri, Rust, and React.
- **Yournal** - A productivity-focused journaling application featuring a Notion-inspired rich-text editor and an intuitive tracking system, built with Next.js, Node.js, Express.js, and PostgreSQL to enable data-driven tracking of mental well-being and personal efficiency.

SKILLS

Frontend: React, JavaScript, TypeScript, Vite, Next.js, React Native, Zustand, Tanstack Query, CSS, Tailwind CSS, shadcn
Backend: Node.js, Express.js, Next.js, PostgreSQL, MongoDB, Prisma ORM, Drizzle ORM
DevOps: Git, Github, Github Actions, Docker, AWS, Vercel deployment
Design: Figma, Google Stitch

INVOLVEMENTS

IAU Cron Software Club **Istanbul, Turkey**
Project Department Sep 2023 - Sep 2024

- As a member of the project department I developed projects and also found project ideas that other members of the club can collaborate on.
